Typical Scene at a District Camp on an Alberta Lakeshore

Viking District Camps Open At Camp Lake on July 5th

Adults to Have Opportunity to Spend 7 Delightful Days
on Lakeshore, July 5 to 12—Boys and Girls,
From July 12 to August 9

Vacation days and holiday plans! What more exciting prospects to consider! They will be no problem for the people of the Viking district this coming summer. Camp Lake, east of town, will be the scene of five camps which will be packed full of good wholesome fun and worthwhile friendships amidst the beautiful setting of the woods and lake. In these times, when we all want a good holiday and have not much time nor money, there could be nothing more suitable than the leaders' camp which is open to the young people and adults anywhere within the province. The camp is designed for those who are Sunday school teachers, boys' or girls' leaders, or church people who would like to spend some time in a very profitable study with some fine leaders. There is a course being given on "Methods of Interpreting the Bible," by Dr. Tuttle, the principal of St. Stephen's College in Edmonton. Those who have been at other camps with Dr. Tuttle will know what a treat it is to be in store for them at this camp. Mr. Hibbert, of Calgary, is giving a course on "Principles of Teaching," for boys and young peoples' leaders. One of the senior leaders of the Y.M.C.A. in

Edmonton is taking full charge of the athletics and is giving a course in recreational leadership. This is Ed. Jordan, a very fine fellow whom you will all like. Then Miss Margaret Kinney, who has been the general secretary of the student Christian movement at the university and who is a graduate of that institution, will give the course in girls' leadership. Miss Kinney has represented our university at various conferences across Canada; she is a great personality and will give the camp the enthusiasm it needs. You really can't afford to miss a week with Miss Kinney and these other leaders.

The dates for this camp are July 5 to 12, the cost is \$5.50, including registration, and your transportation from Viking to the camp will be provided for you. All you have to do is get a registration form from Mr. E. Rands, in Viking, and follow its instructions. Bring your personal effects and blankets, your broadest smile and come prepared for the time of your life.

A day passes quickly at the lakeside and the program will be something like this. Rising, flag raising, a dash to the lake, if you like it; worship by the lake, breakfast, the fellowship of study in the morning hours, then lunch.

"Shower" In Honor of Mr. and Mrs. S. Coulthart

On Friday evening a very delightful shower in honor of Mr. and Mrs. Stanton Coulthart was held in the Hedley hall by the Misses Orril Fischer, Jean McLean and Marjorie Dutton. Music for dancing was supplied by Miss Clara Bothwell, Miss Lorna Saville, Mr. Garfield Coulthart and Mr. Erle Prior. Songs were given by Mr. Ellsworth Goodale and Mr. Cliff Saville. To the strains of the wedding march the bride and groom were compelled to pull a decorated wagon loaded with beautiful and useful gifts through the hall. Mr. Coulthart thanked those present after which all joined in singing "For They Are Jolly Good Fellows." Lunch was then served. Among those present were: Mrs. S. Walker, Dr. and Mrs. Greenberg, Mr. and Mrs. Victor Larson, Mr. and Mrs. Ross McFarland, Mrs. J. C. McLean, Mr. and Mrs. McMillan, Mr. and Mrs. E. Prior, Mr. and Mrs. S. Johnson, Mr. and Mrs. J. Fletcher, Mrs. L. Knudson, Mr. and Mrs. Yonker, Mr. and Mrs. G. Coulthart, Mr. and Mrs. Percy Jones, Mr. and Mrs. Oldham, Mr. and Mrs. Taylor; the Misses Bothwell, Saville, Taylor, McLean, Fischer, Dutton, McMillan, B. McLean, McDonald, Burton; the Messrs. Fischer, Burton, Goodale, Saville, Wilson, Patterson, Clark, Hedley, Yonker, and Mullins.

Following the leaders' camp will come the girls' and boys' camps. One cannot recommend these camps too highly for the all-round development of young life. Under well qualified leaders, with the activities of the day crammed full of fun and life, any boy or girl is assured of a good week, and parents can feel that their children are in a great environment. The cost is reasonable, the water sports, etc., are carefully supervised, and every care is taken to give your children a time that is really enriching.

We solicit the co-operation of parents and teachers and others to interest boys and girls in these camps and see that as many as possible attend.

**Special Sunday School
Services, United Church**
Don't forget the special Sunday School service to be held on June 18th. Everybody is welcome, both adults and children, and a large attendance is expected. We will meet at the United church at 11 o'clock, and from there, weather permitting, we will go to the spot selected. In any case, the service will be worthwhile, whether outside or inside, and the special features of the program should be of interest and inspiration to all.

Heard at the schoolhouse: Teacher: "Where is the population the densest?" Observing student: "Just above the eyes."

Higher Grain Price Possible If Farmer Will Raise Hogs

F. H. Newcombe, District Agriculturist, Says Three Objects Must Be Observed to Benefit from British Pound Stabilization

F. H. Newcombe, District Agriculturist, has the following to say about swine feeding experiments:

Recent improvement in hog prices will probably stimulate production to some extent, indicating once again the mistaken judgement of the "in and out" in the hog business. The stabilization by the Dominion government of the pound sterling for export purposes of most of Canada's agricultural exports should be and probably will be more reflected in a more stabilized hog market. Even during the past period of relatively low prices however, the skillful feeder who could make 10 lbs. of pig out of a bushel of barley (and many can) was undoubtedly receiving a greater return for his grain than the commercial grain cash market would yield and in addition he was finding an outlet for a quantity of grain which had no value on the cash market. It is true that the cost of feed does not represent all the charges to be covered

in the business but in most cases the equipment is on hand is a charge whether idle or in use.

If Canada is to benefit from the pound stabilization referred to above three objectives must be kept in the foreground:

1. Quality of product.
 2. Volume as nearly as possible approaching the quota given Canada by Britain—280 million lbs.
 3. A steady supply of that volume.
- While rapid strides have been in improvement of the quality of our hogs, much still remains to be done and many of low grade hogs continue to be produced. In volume of supply we have demonstrated our ability but in regularity of supply we have fallen down very badly. The "in and out" is responsible for this and not only does he usually fail to strike a good market himself but he also makes the business very uncertain for the man who follows a steady production policy. It is unfortunate that at the very inception of the stabilization and quota system Canada should have a depleted hog population and be unable for the present at least to take advantage of the policy as far as pigs are concerned. The objective of the Alberta farmer should be the regular production of the number of hogs suited to his farming practice and his personal inclination.

Buckskin Flats Stampede, North of Irma, June 21st

The Buckskin Flats Stampede that proved such a success last year will be held this year on Wednesday June 21st, commencing at 10 o'clock in the forenoon. The stampede grounds are located on the south half of section 11-47-9, ten miles, due north of Irma and 2 miles due south of Manville.

The management has gathered together 100 head of bucking horses and 100 head of bucking cattle for the stampede events which will include riding bucking horses in the saddle, loose rope riding, slick riding, wild horse riding, calf roping, wild horse and wild steer race. Mount money will be given to the winners in the bucking broncho riding contest.

Four snappy ball teams will compete in a tournament, besides half mile foot race for men and foot races for children of all ages. A typical clown trick roper will strut his stuff for the amusement of the crowd.

Lunch and refreshments of all kinds will be obtainable on the grounds. Good corrals and a good arena have been arranged for this big stampede and there will be ample grounds for camping, with lots of good water to drink.

An open air pavilion 40 feet square is under erection where a dance will be held at night, music furnished by Coulthart's orchestra.

Admission to grounds: adults 50c; children 15 years and under, free; free free. Stampede manager, Gordon Ambler; baseball manager, P. E. Jones. See posters for further particulars. If June 21 is wet and rainy, the stampede will be held one week later—June 28.

Crescent Hill U.F.A.

The June meeting of the Crescent Hill U.F.A. was held on Monday, June 11th, with a good attendance. The members answered the roll call with a saying of Aunt Het's or Willie Willis. Two good readings were given. Plans were made for a picnic to be held on July 26th, the place not decided on as yet, but watch for further particulars.

Heard at the ladies' bridge party: "Never mind, dear, time is a great healer, you know." "Maybe, but he's not much as a beauty doctor."

These camps are a great thing for the boys and girls and they mean a lot to the people of Viking and surrounding towns. We, who are on the camp committee, urge the people of the district to get behind us and boost these camps wherever you go. Get the children interested. And, may we throw out a suggestion which we know some are already following—if some of you have no children to send, let you be behind this enterprise and believe in our work, hunt up some boy or girl who cannot afford to go because of lack of money, and give them the thrill of their young lives by paying the fee for them and pack them off on the truck with the others. You will be amply repaid.

June L.A. Meeting Held At Home of Mrs. Askin

The regular meeting of the Ladies' Aid was held at the home of Mrs. M. D. Askin on Thursday last. The president, Mrs. Tripp conducted the meeting, and thirteen members answered the roll call.

Minutes of the last meeting were passed and read. Treasurer reported a balance of \$14.87 on hand.

Letters of thanks were read re flowers. The president and members extended a hearty vote of thanks to Y.P.A. for use of scenery and good wishes.

Ways and means of raising money were discussed as the treasury was not half met the present expenses.

Mrs. R. D. Smallwood invited the Aid to hold a garden party at her home. Moved by Mrs. Knudson and Mrs. J. Fenton that same be accepted. It was decided to hold the garden party on Wednesday afternoon and evening of June 14. Committees were appointed for all departments. A charge of 15c and 25c was decided on for the supper.

Mrs. Reeds closed the meeting with prayer.

Alma Mater and Roseberry L.A. Will Hold Meeting

The Alma Mater and Roseberry Ladies' Aid will hold their June meeting at the home of Mrs. R. W. Williamson on June 22. Please note the date of this meeting; it has been changed from June 20th to June 22nd.

Everybody Is Invited To Wedding Dance

A wedding dance will be put on by Mr. S. B. Coulthart in Kiefer's hall, Irma, on Wednesday evening, June 28. A Viking orchestra has been engaged to furnish the music. Everybody welcome. No admission charge.

Dance Is Success

Mrs. Olive Sather put on a dance at Crescent Hill school last Friday, the funds to provide a picnic and treat for the scholars at the close of the term. A good crowd attended and the music and dancing was enjoyed by all.

"Fresh from the Gardens"

Shall Broadcasting Become a Monopoly?

Canadian policy regarding radio broadcasting is a very live subject for discussion and naturally so because the radio has become such an intimate thing in the homes of Canada. It is to the radio that many people, and more especially those in rural parts or where a daily paper is not immediately available, now look to supply them with the correct time, weather forecasts, latest market prices, outstanding news events throughout the world, music for a little dance, religious services, and entertainment of all kinds. It is, therefore, only natural that policies and regulations governing radio broadcasting are of interest and concern to Canadians as individuals as well as to Canada as a nation.

Following investigation of the subject, a Royal Commission reported unanimously in favor of nationalization of broadcasting in Canada. Later a Parliamentary committee endorsed the policy, and finally, by a non-partisan vote in the House of Commons it was adopted. There was almost complete unity on the subject and Canadians everywhere were prepared to welcome and assist in the development of a great national undertaking and service. That was only a year ago, but that unity has disappeared and dissatisfaction is being voiced by the press, numerous organizations, and individuals everywhere. It is rare indeed to hear of any person who is satisfied. This general dissatisfaction has been aired in Parliament and Premier Bennett has promised further study of the whole subject by a special Parliamentary committee next session in an effort to bring back the old unity that prevailed a year ago.

What caused such a complete change in public opinion in a few months cannot be discussed in detail, but from the very beginning the Radio Commission appointed seems to have had a faculty of antagonizing people and of being too dictatorial. It first inaugurated a series of orchestral and symphony concerts. At first these were appreciated by many, but when no variety in programmes was forthcoming, nothing but symphonies and orchestras from Toronto and Montreal, people who desired something else began to criticize. Then followed a series of restrictive regulations and prohibitions imposed on all stations. But the final act of the Radio Commission which does not appear to have pleased anybody was the alteration of the wave lengths of stations throughout Canada in such a manner as to shut out many of the most popular programmes from United States stations in an apparent effort to compel Canadians to listen to the Canadian Commission's programmes whether they desired to do or not.

The Commission being a national body, and in an official sense Canada being a bi-lingual country, the Commission is perforce required to present programmes in French as well as in English. Thus many of its programmes are quite un-understandable to thousands of people in the Provinces, other than Quebec, and while they do not object to programmes being broadcast for the French-speaking portion of the population, they do resent the action of the Commission in so changing wave lengths that they cannot listen to other programmes. Furthermore, many people feel that these French programmes might well be confined to Quebec and not carried from coast to coast.

Announcement is now made that the Radio Commission proposes to build two high power broadcasting stations, one in Saskatchewan and one in British Columbia, and that with the erection of these stations at a cost of approximately a quarter of a million dollars all present stations will be reduced to 100-watt power, thus reducing them to the status of stations with a range limited to a small local district. The result must be the closing of all such stations because they cannot command the commercial support necessary for their maintenance and operation.

In other words, it is not merely public control of radio broadcasting in Canada, which the vast majority of people favor, that is now contemplated, but the creation of a Government monopoly of broadcasting which is quite a different thing, and a proposal which has aroused strong protest.

What is the intention back of this latest decision? It seems to be stated by W. A. Beynon, M.P. for Moose Jaw, who, in a letter to a radio association, says in part: "If the principle of national broadcasting is going to be carried to its logical conclusion, it means the ultimate wiping out of all small stations. This, it seems to me, is inevitable, and the whole question is—shall we continue the policy of national broadcasting or go back to the individual, privately owned broadcasting stations? That national broadcasting will be more economical there can be no doubt. Whether it will, or will not suit the public better, or even whether it will or will not serve them better is another question."

Here is a question in regard to which the people most concerned,—the listeners-in,—should make their views and wishes known to their local M.P. In order that he may present their views to the Parliamentary committee next session. And in the meantime, it would appear that the proper policy for the Radio Commission to pursue would be to play their hand in the expenditure of large sums of public money in the erection of new broadcasting stations until that Parliamentary committee conducts its investigations and reports its findings.

The Prairie Crop Acreage

Two-Thirds Of Field Crop Acreage Of Canada In Three Western Provinces

Over two-thirds of the field crop acreage of Canada is concentrated in the three prairie provinces, and most of this area is seeded to the grain crops, with wheat predominant. Roughly speaking, the specialized wheat areas cover the southern shore of the Red River Valley of Manitoba to the foothills of Alberta and attain their greatest width in central Saskatchewan.

London recently had a bench show for dachshunds only.

Within His Rights

Man Considered Dead By Courts Objects To Paying Income Tax

How can a man who is officially dead be made to pay an income tax? That is what Jean Baptiste Arnaux, fifty-seven-year-old roadman of Maudouze, France, may ask the courts. He served through the World War, and when he applied for papers to prove that he was an ex-service man, he was told that the records showed he had died when he was only a few days old. He appealed, unsuccessfully, to the courts, and is now considering refusing to pay his tax on the ground, that dead men cannot be taxed.

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes:—"My nerves were in such bad condition I found it almost impossible to get good night's sleep. I was also bothered with headaches and dizzy spells. I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I can hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Hamilton, Ont.

Seeking Lost Continent

British Scientists Are Preparing To Explore Indian Ocean

British scientists are to explore the bottom of the Indian Ocean, four miles below the surface, in a search for traces of the lost continent of "Lemuria."

An expedition under Captain J. M. Mackenzie, who captained the "Discovery" of Sir Douglas Mawson's last voyage in the Antarctic, will leave London in August to begin the search. They will be nine months at sea (between Africa and India) in a tiny research craft of only 105 tons. The craft is now being fitted at Alexandria with latest inventions for under-sea exploration.

Steel bottles, which close automatically at a certain depth, will be let down to take specimens of the sea life and record temperatures. Lead lines will be dropped four miles down to take samples of the ocean floor.

In this way the expedition hopes to discover traces of the continent of "Lemuria," which is supposed to have stretched from Madagascar to Sumatra and India in pre-historic times. Another object is to discover whether there are mountain ranges and ridges under the sea such as the Meteor expedition found in the Atlantic. The scientific leader of the expedition will be Colonel Seymour Sewell, D.Sc., director of the zoological survey of India.

Weather Man Fickle

Has Always Staged Summer Changes

Judging from a diary kept by Mrs. Reidel, wife of General von Reidel, commander of the German mercenary troops stationed at Three Rivers, Quebec, from 1778 to 1782, the weather man was just as fickle in her day as he is now. In fact a sudden change in temperature spoiled her chances of getting to Montreal for her spring outfit.

Mrs. Reidel's diary, discovered by officials of the McCord Museum in cutting over material for an extensive exhibit illustrating Canadian history during the period of 1770-1870, reveals that it was evidently her custom as becoming a lady of rank and distinction to do her spring shopping in Montreal. In keeping with this custom she set out one spring for the metropolis by horse-drawn carriage, travelling on the ice of the St. Lawrence. At Sorel an overnight stop was made and during that time a rapid change in the weather took place. Imagine her disappointment when the good lady awoke next morning to see her sailing up the river where she had only the night before travelled on ice.

To Salvage Gold

Italian Vessel Engaged In Raising Treasure From Sunk Liner

The Italian salvage ship "Antiglio" has sailed for a final attempt to raise approximately \$1,500,000 in gold still in the strong room of the sunken P. and O. liner "Egypt," lying 70 fathoms deep off Point de Raz.

In four previous attempts of work the Italian divers recovered \$2,500,000 of the total cargo of \$5,000,000 in gold and silver which the liner carried from London on her last voyage, May 19, 1922. The "Egypt" sank in 20 minutes after being rammed in a fog, by the French freighter "Seine." Of the 44 passengers and 291 crew, 96 lives were lost.

After finishing with the "Egypt," the "Antiglio" probably will be engaged by the Egyptian government to seek gold and other treasure from Napoleon's ships which were sunk by Lord Nelson off Aboukir Bay in 1798.

Child Prodigies Banned

From French Stage

Any Under Thirteen Are Not Allowed To Appear

France has definitely banned child prodigies from the stage. Legally no one under thirteen is allowed to appear, but special licenses have been issued. The Cabinet has decided that no more of these will be given. Children working for the films are included, and many child stars are affected. The decision followed the receipt of reports by the Ministries of Health and Public Education that children on the stage are made to work long hours without sufficient time for study.

The colors of the king of England's racing stable are purple, gold braid, scarlet sleeves and black velvet cap with gold braid.

British Columbia is the largest silver-producing province in Canada.

Many new small factories are being started in Japan.

NOT A PAIN AT 78

She Feels Like 48

Aches and pains are not inevitable in old age. When they do come, there is always a cause for them—a cause that can be overcome. Here is a little lesson on growing old, by a woman of 78—

"For the last five years I have taken Kruschen Salts and I tell you I am 78 years old. I have not a pain in my body, and I feel as young as I did at 48. I give the credit to Kruschen Salts. No one will believe my age."—(Mrs.) C. M.

Most people grow old long before their time because they neglect one vital need of health—the need for internal cleanliness. Eventually they start the healthy Kruschen habit. Then, probably for the first time in their lives, they start getting rid every day of all waste matter from the system. And almost immediately they feel their youth has returned; they feel energetic and happy. In a word, they've got that famous "Kruschen Feeling."

Exhibits From Britain

Good Representation From United Kingdom For World's Grain Show

Leading representatives of the agricultural industry in the United Kingdom will represent the government at the world's grain conference, opening in Regina, Sask., July 24, while agricultural, milling and other interested organizations are considering the question of sending delegates. It is also probable a small parliamentary group will visit Canadian connection with the conference.

Announcement was made by the ministry of agriculture that the government of the United Kingdom will be represented by Sir Daniel Hall, director of the John Innes horticultural institute. Sir John Hall, director of Rothamsted Experimental Station and of the imperial bureau of soil science and William Robb, director of research, Scottish Society for Research in plant breeding.

The Rothamsted station at Harpenden, Hertfordshire, is preparing an educational exhibit including sheaves of wheat from the 89th successive crop grown on the same field under varying conditions. Britain will be well represented in competitive classes and in exhibits of small farms.

Scotland is sending samples of oats which already have won high awards in home competition. In addition there will be wheat and barley exhibits from various parts of England and varieties of flax as well as grain will be sent by northern Ireland.

Recipes For This Week

(By Betty Barclay)

HODGE PIDGE PUDDING

(Serves 6)

- 1 cup orange pulp, diced.
- 1 cup apples cut fine.
- 1/2 cup broken walnut meats.
- 1/2 cup seeded raisins, chopped.
- 1/2 cup orange juice.
- 1/2 teaspoon ground cinnamon.
- 1/2 cup sugar.

- 6 tablespoons bread crumbs.
- 1 teaspoon butter.

Mix all ingredients except butter. Put into buttered baking dish, dot top with bits of butter and bake covered in a moderate oven (350 to 400 degrees Fahrenheit) until apples are tender. If apples are very dry, increase the amount of orange juice slightly. This is a pudding boys like.

DERBYSHIRE SANDWICHES

Run through the meat grinder enough finely sliced boiled ham to make one cup of it when minced. Add one-half teaspoon mixed mustard, few drops tabasco sauce, one teaspoon sugar, salt and pepper to taste, and enough Chiffon sauce to make a smooth paste. Spread on this slices of buttered bread.

The Honest Friend

We are all travellers in the wilderness of this world, and the best that we find in our travels is an honest friend. He is a fortunate traveler who finds many. We travel to find them. They are the end and reward of life. They keep us worthy of ourselves; and when we are alone, we are only nearer to the absent.—Robert Louis Stevenson.

Did His Own Growing

A man was accused at Clerkenwell of having "attitude" and threatening attitude" to a dog and its owner. "I nearly knocked me down," he explained, "so I growled at it." "You mean," suggested the magistrate, "that it growled at you?" "No," the man insisted. "I growled at the dog."

Exports from Indo-China last year were nearly equal to those of 1931.

Plan Long Flight

New York To Bagdad Is Aim Of British Flyers

Some time this summer James A. and Mrs. Amy Mollison, famous British husband-and-wife aviators, will hop from Roosevelt Field, New York, on an attempt to set up a new long-distance record by flying non-stop to Bagdad or beyond.

If they make Bagdad they will have beaten by some 700 miles the record of 5,340 miles established in February of this year by the British airmen, Nicololetti and Gayford, when they flew from England to South Africa.

Roosevelt Field was chosen by the Mollisons as the starting point for their first dual aerial adventure because it is the only suitable airport having a concrete runway.

The laden weight of their machine will be such that experts have advised the flying couple that there is no aerodrome in England having sufficient length and firmness for taking off purposes.

Their machine, now in process of construction in England, will be shipped in parts to New York and will be re-assembled at Roosevelt Field. It is a twin-engined monoplane of the De-Havilland "Dragon" type, and would normally accommodate six passengers, pilot and baggage.

Three vast cylindrical tanks, placed so close together that they resemble the boiler of a giant locomotive behind the pilot's seat, replace the passenger's seats.

Only one pilot's seat is provided in the forward cockpit, with just enough elbow room for the Mollisons to change over the controls of the air. There is a hatchway only one foot in height to enable them to crawl from the cockpit, underneath the tanks, to a tiny cabin in the tail of the machine.

The gasoline capacity will enable the machine to fly up to 6,000 miles in average conditions. With a tailwind during parts of the journey the 10,000-mile limit should be exceeded.

Other details regarding the machine and its equipment are being kept secret, but it is not believed that the aeroplane will carry radio.

Records Carefully Kept

Plenty Of Documents About Hudson's Bay Company Trading Posts

"Never the less, the greater life of any country been as carefully recorded and as thoroughly documented as the journals of the fur trade posts of the Hudson's Bay Company in Canada," said Douglas MacKay, speaking to the Kinsmen's Club of Montreal.

Under the terms of the original royal charter, London as the head office of the Hudson's Bay Company, remains the repository for all the company's archives, and the gathering of these from the posts and outposts a few years ago resulted in an accumulation of nearly six tons of documents," Mr. MacKay declared. The work of organizing and cataloguing this material has been proceeding under the direction of the company's archivist in London.

At the present time, this vast quantity of historical documents, which is in reality the richest source of material of western and northern Canadian history, is in better shape for the use of accredited historians than ever before.

Earned Gratitude Of Indian Mohammedans

Lord Lothian Arranged Return Of Valued Robe To India

Lord Lothian, former Under Secretary of State for India, has earned the undying gratitude of numbers of Indian Mohammedans by arranging for the return to India of a holy robe on which is inscribed the whole of the Koran. The Koran is the highly revered Mohammedan Bible. The robe was taken away from India at the time of the mutiny of 1857. It has remained in England in the hands of a noble family. Through Lord Lothian's intervention the owner has made a gift of it to the Muslim University of Aligarh, where the robe has been placed in a prominent position in a showcase and is venerated by the faithful. Little is known about the history of the robe.

A Heavy Responsibility

The city council of Chicago, by resolution, has given Alderman John Coughlin, the Beau Brummell and dean of that body, the sole responsibility of designating the time when Chicagoans may put on their straw hats.

Tons of gold bullion placed in a secret "war chest" before Japan went off the gold standard are said to exist in Tokyo.

Italy expects an increase in employment in the next few months.

Merrily

No wonder they're merry—rolling their own with Ogden's Fine Cut. It's so easy to roll a smoother, more satisfying cigarette with this fragrant cigarette tobacco.

... And they're using "Chantecler" papers, of course. Ogden's Fine Cut and "Chantecler"—that, Sir, is the finest combination any man can use for rolling a really better cigarette.

Your Pipe Knows Ogden's Cut Plug

Modern Home In Sweden

Disabled Poor Will Have Every Care and Comfort

Sweden is completing constructions of its new home for the disabled poor at Nynashamn, near Stockholm, and it is declared to be the most modern in Europe. Latest equipment for curing rheumatism, nerve diseases, asthma, and other afflictions has been installed by the State Pension Board. Five experienced physicians and a large staff of assistants and nurses will be in charge of the medical work. The new home has several hundred rooms and wards, laboratory, terraces and galleries for sunbaths and a well-equipped gymnasium. There is also a large assembly hall for lectures, stage performances and movies. Success at rehabilitating the disabled penniless has been encouraging in Sweden, as about 60 per cent. of the patients treated have regained ability to earn their own living.

Rhubarb Was Once Medicine

Rhubarb pies and rhubarb sauce are now quite common every day. The rhubarb plant was used in pharmacy long before its value as a food became known. It grows wild on the banks of the Volga in Russia, and was used in the making of tarts in 1820 and soon became common in Canada and the United States. It was relished by the early settlers when fruit was scarce.

The office bachelor says the difference between an animated doll and a modern girl is that the latter doesn't holler "Mamma" when squeezed.

Britain has nearly 50,000 policemen on regular duty.

Throw away dusters

R. E. NOBLE, Manager

Main Street

Dr. Richardson, of Viking, has taken over the dental practice at Irma of Dr. Murray and will from now on visit Irma every Friday where he will continue to work in the rear of the Drug Store.

Miss Mrs. Victor Larson visited at the home of Mr. and Mrs. S. M. New on Sunday.

Born-To Mr. and Mrs. Wm Cooper on June 7th, a son.

Died-The infant son of Mr. and Mrs. William Cooper passed away on June 7th, living but seven hours after birth.

Eric Nottingham is working at J. A. Allen's.

Born-To Mr. and Mrs. Otto Bethge on June 7th, a daughter.

Mr. A. Turnbull returned from Edmonton on Saturday last.

Mr. T. Kirkpatrick is applying a fresh coat of paint to Mrs. Tate's residence.

Mrs. J. R. Whyte and daughter, Labelle, are away to Toronto for a visit.

Mr. Walter Locke, formerly of Prince Edward Island, has been visiting his uncle, Mr. A. H. Locke, during the past week.

The Locke family motored to Edmonton and back last week end.

Mr. P. E. Jones was a business visitor to Edmonton the first of the week.

Messrs. Pryce Jones and Jack Fletcher attended the Masonic Grand Lodge as delegates this week, in Calgary.

Mr. Cornish of Wainwright is assisting at L. B. King's during Mrs. King's illness.

Mr. Simon Barber of Shawville, Quebec, arrived last Saturday morning for a visit with his son, Mr. W. T. Barber.

Mr. Emil Wirth has completed the removal of the McDowell warehouse. Mr. Wirth intends to use the lumber to do some building on his farm, north of town.

Mr. Stanley Brown, of Hardisty, has been engaged to assist in McFarland and Co's store during Mr. Skiles' absence.

Miss J. McDonald, of Edmonton, sister of Mrs. S. D. Coulman, returned to her home last Saturday after a short visit in this district.

A lawn social will be held at Mr. Fred Knudsen on Wednesday, July 5th, under the auspices of the Lutheran Ladies Aid Society. Watch The Times for further particulars later on.

A special Ladies' Aid meeting to do bazaar work and add to the traveling basket will be held at the home of Mrs. Tripp on Thursday afternoon, June 22. Everybody cordially invited.

The little Dallow baby, who is having treatment for her crippled foot at the Red Cross Hospital, Calgary, is progressing nicely and is able to step properly on her foot.

Geo. Clay, of Paradise Valley district, of the Jr. U.F.A. for Battle River, and Miss Kathleen Ogilvie and Norman Heath, of McLaughlin, motored to Irma where Florence Allen joined them and all went on to Edmonton to take in the Junior Concomer at the University.

Mr. and Mrs. J. A. Allen and Ellsworth, of Mrs. C. H. Allen and daughters May, Ellen and Etta visited with Mrs. Chase and Lloyd Allen at Strawberry Plains on Sunday, Mrs. Maine, who has been visiting the past two weeks with Mrs. Chase and Lloyd (her grandchildren) returned with them.

Mr. and Mrs. R. L. Shotts left early Monday morning for a month's sojourn in the western states, British Columbia, and Vancouver Island. Mrs. Ted Dallow is taking care of the Misses Margaret and Doris at the Shotts' home during their absence. They will be visiting a brother of Mrs. Shotts' near Vancouver, whom she has not seen for sixteen years.

KINSELLA KERNELS

Kinsella, June 12—Mr. and Mrs. Homer, of Toronto, arrived last Friday morning on No. 1 and are visiting their daughter, Mrs. J. F. Murray.

Mr. Third Str. arrived from the East on Saturday morning, and is visiting his son, Mr. A. Third.

A few from here attended the play and dance at Rodino Friday evening.

Mr. A. A. Wadden returned home on Monday evening from Lethbridge where he had been visiting his brother. Mr. and Mrs. Simmons, the former who had been relief agent here in Mr. Wadden's absence, returned to their home in Edmonton on Monday.

Mr. and Mrs. E. C. Williams and daughter, Mr. Frank Williams and his mother, Mrs. M. Williams, spent Sunday afternoon at the home of Mr. and Mrs. J. Scott, northeast of town.

Mr. William Revell shipped a carload of hogs to Montreal last Friday.

Mr. Jack Corbett left for Montreal on Friday evening. We understand that Jack intends to remain in the East for a while.

The Brown hoist of the C.N.R. is

in the gravel pit loading gravel.

Miss Lawe, of Greenshead, spent the week end with friends here.

Mr. J. Bishop, of Vermilion, is visiting his daughter, Mrs. J. N. Bishop. Mr. and Mrs. E. C. Williams motored to Edmonton Monday evening.

Miss Kathleen Ferries spent the week end at Rodino with Mr. and Mrs. P. Huse and Miss Alice Murray spent Saturday afternoon in Viking.

Soup

"A Few Noodles by Tun."

The announcement that the Edmonton police department had organized a flying squad brought a telephone call from an old lady there. "My canary has escaped," she said, "Would you mind notifying the flying squad?"

"Pardon me, lady, but didn't you see me wave at you," said the Edmonton cop when a woman ran past a stop sign. "Of course I did," she replied. "And didn't I wave back? What do you expect me to do, throw you a kiss?"

"There is a man here to see you, dear," said a local lady to her husband the other evening, "and you must forgive me, dear, but your health has been worrying me lately so I sent for him." "Who is it; the doctor?" he asked. "No, a life insurance agent," she replied.

"I'd like to get them a wedding present that will be something that they'll need," remarked a local lady to her husband. "Yeah? Well, then I'd say get them a cook," he replied.

Something to worry about—cats cannot see in absolute darkness, but they can see in the dusk very accurately.

"I am punishing you because I love you," said a father here to his little son and that he had taken into the woodshed. "I wish I was big enough to return your love," the boy replied.

"Last night I woke up in the dark and I thought my wrist watch was gone," said Sandy to George at the gas station. "Was it gone?" asked George. "No but it was going," replied Sandy.

A local high school student who has been going around with some of the girls has been jotting down their experiences as expressed by themselves. He found that one had "simply died" from the heat at least six times; one was "kicked to death" by the stunts of movie comedians; another was "knocked silly" by meeting a boy from another town; one claimed she had been "driven crazy" seventeen times by a telephone pest; another was "frozen stiff" by the cool evening air while out riding; one "died" laughing over the hat another girl wore; and the climax came with the last one who "liked to bust" after filling up on ice cream.

I don't see how that umpire can keep so cool" said a local girl to her Camrose fellow when a chewing match started at the ball game Sunday. "That's easy," he replied, "Look at all the fans he has around him."

"COCK AND BULL"

You have often heard the expression "a cock and bull story" without realizing it had special significance when applied to yarns told by automobile tourists. Nevertheless this expression can trace its origin direct to the early days of highway transportation. It seems in England's merry coaching days, travellers coming into Stratford from the north stopped at the narrow main street, while travellers from the south stopped at the "Bull," on the other side. After dinner the travellers would consult each other about the state of the roads they were to traverse next day, and there were frequent over-statements about highwaymen, snow-drifts and washouts. In this country, even the official road bulletins sometimes turn out to be "cock and bull" stories.

Higher Grain Price Possible
If Farmer Will Raise Hogs
(Continued from Page One)

of the grain looms large. This is especially noticeable when hog prices are low and profits in hog feeding are questionable. Under such conditions consideration must be given to the problem of whether or not it is economical to grind the grain for pigs or to feed it whole. If not sufficient grain is saved to pay for the cost of grinding the practice may be regarded with some doubt. The truth of this can only be determined by carefully controlled experiments where the growth and the feed consumed are systematically recorded;

The objects of the experiment were to compare whole grain and ground to various degrees of fineness as to

amount of feed eaten daily, rate of growth, and feed requirements for growth, and also to allow pigs to help themselves to whole grain and to variously ground grain. The pigs used were of Yorkshire, Yorkshire-Tamworth and Yorkshire-Poland China breeding and were uniformly allotted as to size, condition, age, sex, breeding, type, and general thrift.

The pigs were on dry lots without pasture. Grain was self-fed. Water was available at all times from barrels with automatic waters attached. The grain used was oats and barley equal parts by weight and tankage was fed at the rate of eight per cent.

In arriving at the actual cost of grinding grains such factors as cost of power, man labor, depreciation and interest on equipment were considered. Cost of grinding was as follows:

Cost per 100 lbs. (cts).	
Oats fine	5.4
Oats medium	1.7
Oats coarse	.95
Barley fine	4.8
Barley medium	1.45
Barley coarse	1.05

1. Pigs fed finely ground grains made gains at the rate of 1 lb. per day faster than those fed medium medium ground and 15 faster than those fed coarsely ground.

2. Pigs fed whole grain gained .98 lbs. per day as against 1.46 lbs. per day for the finely ground grain. At the end of the experiment it would have taken the "whole grain pigs" 20 days longer to reach the weight of the "finely ground pigs".

3. There was no apparent difference in palatability in the different grindings, though the pigs fed whole grain did not appear to like it as well as the ground grain and ate 1 lb. less per day.

4. When the grindings were fed "cafeteria" style the pigs ate as follows:

Fine, 2.76 lbs.; medium, 1.38 lbs.; coarse, 0.17 lbs.; whole, 0.91 lbs.

5. Starting at 46 lbs., weight it took the following time to make 200 lbs.:

Fine, 417 days; medium, 122 days; coarse, 127 days; whole, 156 days.
--

Note that pigs eat very little whole grain until they reach 75 to 100 lbs., after which they seem to like it better.

6. The saving in feed when ground as compared with whole was more than enough to offset the cost of grinding, and fine grinding was justified on the same basis.

Feed required to produce gains in weight shown relatively as follows:

Fine, 100 lbs., grain, medium, 104 lbs., coarse, 109 lbs., whole, 110 lbs.
--

8. From the standpoint of feed cost alone, grinding grain finely for pigs can be justified when the cost of grinding does not exceed the value of 10 lbs. of grain.

Protein and Mineral Requirements

The ordinary grains are on the low side in protein and decidedly lacking in mineral matter. Skim milk is the ideal protein and mineral rich feed to add to grain but unfortunately there is a scarcity of this in Alberta and becomes a matter of importance to study the requirements of pigs in this regard so as to provide suitable substitutes when they are needed and to eliminate these substitutes when their use would not be economical. Pigs were confined in piggery and no access to soil.

1. When farm grains were fed alone the rate of growth was poor and some of the pigs were definitely crippled.

2. The average daily quota of protein required to supplement the grain would be supplied by five lbs. of skim milk or by eight per cent of tankage.

8. Feeding the protein supplement resulted in a decrease in the grain required to produce 100 lbs. of pig.

4. Feeding ground limestone promoted growth, saved grain, and prevented "cripping". When it was added to the grain without the protein supplement one lb. of limestone replaced 9.1 lbs. grain and while it cost \$30.00 per ton it had an actual replacement value of \$87.00 per ton. It was used at the rate of 2 lbs. in 100-lbs. grain.

5. When the protein supplement costing \$25.00 per ton was added to the grain without limestone it replaced 42 lbs. of grain and had an actual replacement value of \$40.30 per ton.

6. The main limiting factor in the use of grain alone is the lack of mineral matter. This appeared to be more serious than the lack of protein.

7. For practical purposes sufficient mineral and protein is supplied by the use of 5 lbs. of skim milk per head per day (average) or by the addition of eight per cent tankage to grain ration.

Recently there have been reports of crippling in pigs especially in "winter pigs" and while it has usually been called "rheumatism" there seems to be little room for doubt that much of it has been caused by lack of a proper supply of mineral matter in the feed.

The Great Mistake.

This is the story of a prudent man, as told by a Kansas newspaper: He brushed his teeth twice a day, wore rubbers in wet weather, did his daily dozen, slept with windows open, was careful with his diet, had a medical examination twice a year, never smoked, drank or indulged in any kind of excess. He was all set to live to be 100 years old.

The funeral was held last Wednesday. He is survived by 18 specialists, four health institutes, six gymnasiums and numerous manufacturers of health foods and antiseptics.

He had forgotten to look out for a train at a grade crossing.

A HUNDRED YEARS AGO.

There was not a public library in the United States or Canada.

Almost all the furniture was imported from England.

An old copper mine in Connecticut was used as a prison.

There was one hat factory, and that made cocked hats.

Every gentleman wore a queue, and powdered his hair.

Croquet players were objected to because they dulled the knives.

A gentleman bowing to a lady always scraped his foot on the ground. The whipping post and pillory were still standing in Boston and New York.

Beef, pork, salt fish, potatoes and hominy were the staple diet all the year round.

Buttons were scarce and expensive.
